Wholesale prices are quoted to established nurseries who are purchasing for resale. Prices are F.O.B. origin and packing charged at cost.

Public Institutions are defined as public or semi-public bodies, buying in quantity for their own use and not for resale, such as cemeteries, universities and colleges, city, state, and federal government agencies, etc. Where delivered price is requested any packing and shipping charges should be added.

Retail prices are to the buying public.

MORAINÉ®

This variety of Honey Locust tree is covered by U.S. Plant Patent No. 836. This variety of Ash tree is covered by U.S. Plant Patent No. 1768. Both are being handled under license from The Siebenthaler Company, owner of the registered trademark Moraine® in the United States and Canada.

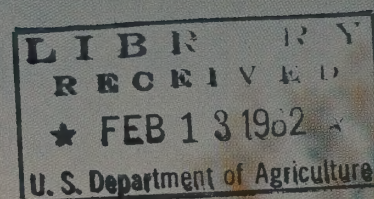

# Moraine® Ash

*distinctive  
landscape  
beauty*

The distinctive symmetry of the hardy Moraine Ash makes it an ideal tree for interesting plantings around homes, industrial plants and in public parks. It has every desirable trait of appearance, plus exceptional durability. Its distinctive all-season beauty, rapid growth, graceful foliage and clean habits make the Moraine Ash and especially desirable tree for distinctive plantings.

the genuine  
**MORaine® ASH**

This variety of Ash is covered by U. S. Plant Patent No. 1768, issued to The Siebenthaler Company, Dayton 5, Ohio, owner of the registered trade mark "Moraine," in the United States and Canada.

# 6 outstanding features are making the **MORaine<sup>®</sup> ASH** America's landscaping favorite

The Moraine Ash owes its widespread popularity to many unique features. It is a tree that has been developed to serve the special needs for a tree of distinctive beauty and decorative effect in modern landscape plantings. You, too, will like all the quality features of the graceful and distinctive Moraine Ash.

## *Check these Moraine<sup>®</sup> Ash features!*

### **1. Symmetrical Growth**

Attractive shape is evident in both young and mature trees. Achieves 35 to 40 ft. height.

### **2. Late Season Growth**

Small olive-green foliage persists later in autumn than most ash trees. Trunk and limbs are smooth barked.

### **3. Clean—Minimum Maintenance**

Bears few small seeds. The small leaflets fall in late autumn, sifting down into the lawn, making it unnecessary to rake them up.

### **4. Grows Anywhere**

Tested and proved hardy as to climatic conditions in most

of the United States, including Maine, Montana and North Dakota. Adaptable to variety of soil conditions.

### **5. Ideal for Street and Lawn Planting**

Special "breeding" eliminates undesirable features associated with common Ash. The Moraine Ash shapes itself, holds its beautiful olive-green foliage into late fall, and its lacy shades promotes luxurious lawn growth underneath.

### **6. Ideal Size**

Medium height trees are the most acceptable for home and industrial planting.

# this is MORaine<sup>®</sup> LOCUST

*distinctively beautiful...  
graceful and stately*

Moraine Locust above is 21 years old

The delicate green foliage of this graceful tree, its fast growth and resistance to disease and insects have made the Moraine Locust America's favorite tree. It attains a twenty-five foot height in just seven years . . . fine lawn grasses grow luxuriantly right up to the base of the tree . . . yet its filtered light does not permit crab grass to germinate . . . safe in high winds because its fine leaves offer less resistance. No wonder this staunch and graceful hardwood tree is winning new friends everywhere.

MORaine<sup>®</sup> Locust

This variety of Honey Locust tree is covered by U. S. Plant Patent No. 836 and is being handled under license from The Siebenthaler Company, owner of the registered trademark "Moraine," in the United States and Canada.

# 8 outstanding features are making the MORaine\* LOCUST America's favorite shade tree

Throughout America the Moraine Locust is rapidly becoming a favorite shade tree for Home, Industrial and Park landscaping. Hundreds of thousands are growing vigorously under all climatic conditions providing a light lacy shade under its bright green umbrella. This aristocrat of shade trees owes its popularity to a brilliant horticultural achievement which incorporates every desirable shade tree quality in its rugged structure.

*These recognized features of the THORNLESS  
and SEEDLESS Moraine Locust speak for themselves.*

## 1 Vigorous fast growth

Grows to a height of 25 to 30 ft. in just 10 years, increasing its diameter faster than either the soft maple or Chinese elm.

## 2 Bright green foliage

Long graceful leaves keep their beautiful bright green color all season long—even in areas where rainfall is light.

## 3 Graceful shape

Moraine Locust branches arch upward and outward to form a wide spreading vase-shaped tree of great beauty. Its long delicate leaves give the tree a willowy grace, unmatched for ornamental plantings.

## 4 Storm resistant

The branches of this hardwood tree bend under heavy strain and withstand heavy wind and snow. Breaks or splits are extremely rare.

## 5 Clean—free of maintenance

No thorns—no unsightly seed pods to clean up. The small leaflets fall in late autumn and sift down into the lawn making it unnecessary to rake them up.

## 6 Encourages luxuriant lawn growth

Sunlight filters through the light foliage to permit luxuriant growth of lawn grasses underneath the branches of the tree.

## 7 No surface roots

Moraine Locust roots deep, thus does not rob soil of nourishment required for good lawn grass growth.

## 8 Grows anywhere

Parent tree is the Honey Locust which produces good growth in any kind of soil in areas of light to moderately heavy rainfall. A long lived tree from New York to Minnesota and from Texas to Ontario.

*Moraine Locust—the aristocrat of shade trees.*
